The Cat® E Series Mini Hydraulic Excavators deliver high performance in a compact size to help you work in the tightest applications. All four models feature a large, integrated counterweight and excellent stability while maintaining a compact radius design. With the new COMPASS control panel, the E Series has new standard features like a password protected security system, Eco mode, adjustable auxiliary flow control, and continuous flow. These new features make the machines more productive, versatile, and cost effective.

# **Operator Station**

# Superior comfort to keep you productive throughout the work day

#### **Comfortable Working Environment**

Spacious and comfortable operator station with excellent visibility and legroom keeps the operator comfortable and reduces fatigue. Standard features include:

- Reclining suspension seat with adjustable wrist rests.
- Pilot operated controls on all services including travel levers and dozer functions.
- A pattern control changer (not available in all regions) is accessible from the cab to switch between excavator and backhoe style controls.
- Ample storage space under the seat that can be locked for added security.

#### **Joystick Controls**

The boom swing and auxiliary hydraulic functions are located at your fingertips providing smooth, easy operation. They also eliminate foot pedals and free up the floor for more room for the operator's feet. 100% pilot controls provide consistent flow and pressure throughout the life of the machine. This also allows all controls to be locked out while starting the machine.

# **Performance**

Powerful digging with precise control

#### **Stability**

All four E Series models feature excellent stability while maintaining the compact radius design. This increased stability leads to more productivity and versatility through the use of heavier work tools and the optional long stick.

#### Fast, Powerful Digging with Load Sensing Hydraulics

High digging forces and fast cycle times deliver the productivity that your job demands. Load sensing hydraulics optimize flow for smooth, powerful performance and increased fuel efficiency.

#### **200 Degree Bucket Rotation**

Industry leading bucket rotation of over 200 degrees provides greater material retention during truck loading.

It also allows for easier vertical wall digging without having to reposition the machine.

# **Engine**

High performance power train provides optimized engine horsepower and strong performance

Automatic engine idle automatically lowers engine revolutions when not in use to conserve fuel and lower environmental noise and emissions.

#### **Automatic Two Speed**

With the standard automatic two speed feature, the machine will automatically balance high speed and torque travel requirements based on the conditions to give the operator the optimum speed and control. The machine can be put in low gear if slower travel is desired while in tight conditions.

## **COMPASS Control Panel**

## Complete, Operational, Maintenance, Performance and Security System

The brand new COMPASS control panel on the Cat® E Series mini hydraulic excavators was specifically designed by Caterpillar for compact excavators. It adds several new features to the machines increasing the amount of customer value. All of the following features are now standard on all five of the new E Series models.

**C**omplete – All of the control panel features are standard on all five of the new E Series models

**O**peration – Simple operation of the pattern changer, hydraulic quick coupler and fuel gauge visibility all at the push of a button

Maintenance – Maintenance intervals, diagnostics and work hours

**P**erformance – Save up to 20% fuel while maintaining optimum performance levels

And

**S**ecurity – Anti theft device with individual user and master passwords

System – Ergonomically designed control panel

#### **Passcode Protected Security System**

A standard anti-theft device now comes on every E Series compact excavator. A five digit alphanumeric password is required to start the machine when the anti-theft feature is enabled. There is a master password and up to five user passwords can be created by the owner if desired.

Keep your machine safe on a busy job site by locking it when you are not around

#### **Adjustable Auxiliary Work Tool Flow Control**

The E Series machines now have simple adjustability of the flow going down the boom and stick to the work tool. Both the standard main line and optional secondary auxiliary hydraulics can be adjusted on a scale of 1–15 through a few buttons on the control panel.

Adjust the flow to your different tools with a simple push of a button

UNLOCK the new features and experience the value of the exclusive COMPASS control panel on the new E Series compact excavators

#### **Economy Mode**

This feature allows your machine to be set in a more economical power setting with a simple push of a button. While operating in this mode, the machine will maintain excellent performance levels while saving up to 20% fuel through a slightly lower engine setting.

Save money with the new E Series compact excavators

#### **Continuous Flow**

Once this feature is enabled through a button on the monitor, the new E Series machines can run in continuous flow mode. With the auxiliary hydraulics on the right hand joystick, just hold the roller switch at the desired flow rate and direction for 2.5 seconds and the machine will maintain that flow rate until it is turned off.

Maintain hydraulic flow to your tools at any flow and in any direction with the simple push of a button

#### **Pattern Changer**

Change the operating pattern between excavator and backhoe with a simple press of a button from the comfort of the cab.

Exclusive push button pattern changer is safe and easy

#### **Maintenance and Performance Information**

Easily keep track of various maintenance and performance parameters of your machine.

Reset the maintenance intervals and ensure the machine is receiving proper care maximizing the life of the machine

# **Compact Radius, Zero Tail Swing**

Work in the tightest areas

#### **Compact Radius**

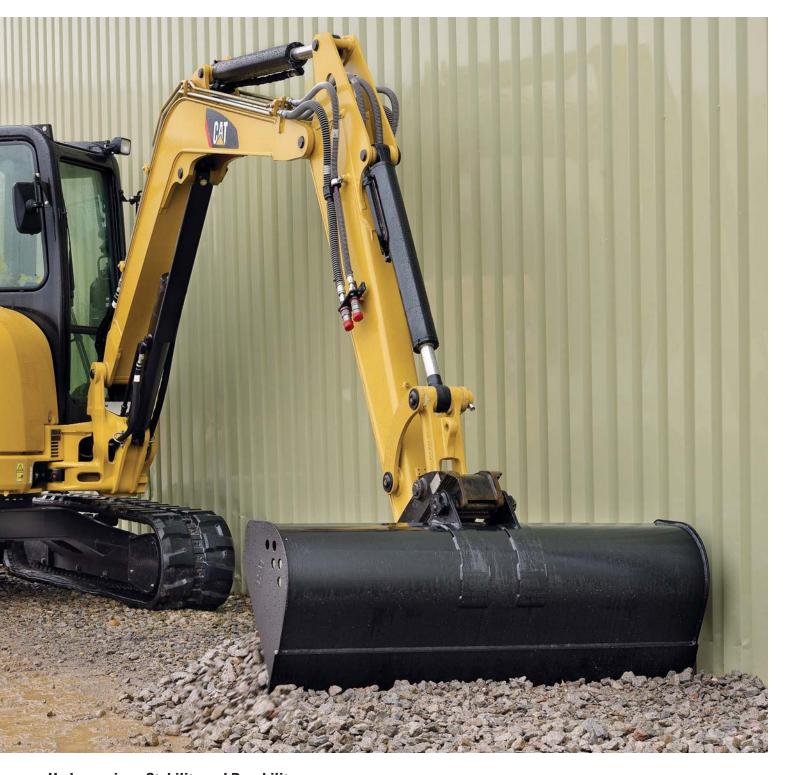

The compact radius design gives greater machine versatility and the capability to work within confined areas. This allows the operator to concentrate on the work being done without having to worry about damaging the back of the machine or other job site obstacles. On the 305E CR and the 305.5E CR, the upper body stays within 140 mm (5.5 in) of the undercarriage.

#### **Zero Tail Swing**

New to the E Series, the 303.5E CR and the 304E CR models feature a zero tail swing design. On these models, the radius of the upper body stays entirely within the width of the undercarriage.

#### **Undercarriage Stability and Durability**

**Rubber Track** – The standard rubber track lets you work on multiple surfaces such as grass, pavement or stone without damaging the surface or machine.

**Steel Track Option** – Optional steel track is available for harsh conditions such as demolition. The extra weight of the steel tracks generally provides better stability when digging over the side of the machine. (Not available on the 304E CR.)

**Rubber Pads** — Optional rubber pads can be attached to the steel track to prevent damage to paved surfaces and minimize noise and vibration during travel with the steel track system. This option provides the maximum overall stability.

# **Dozer Blade**

Maximize your productivity

#### Simple Dozer Control with Float Function

The dozer function is pilot controlled from inside the cab, providing smooth, proportional operation. The standard float function is enabled by pushing the lever fully forward into the detent position. Cleanup and backfilling is easier since the operator does not have to adjust the blade height during travel.

#### **Excellent Blade Visibility**

Visibility to the blade is excellent in any position, allowing the blade to be positioned behind the operator and away from the front linkage for better access when back dragging and finishing in tight areas.

#### **Angle Blade Option**

Increase machine versatility with the Cat angle dozer blade. Built for strength and durability, the hydraulic angle blade features a hardened steel wear edge and good protection to cylinders and hydraulic lines. The angle blade can be positioned straight ahead or angled up to 25 degrees to the left or right. This reduces the number of times required to back up and reposition when backfilling so you can finish the job faster. All functions of the blade are controlled with one joystick using a proportional roller switch for the angle function.

# **Coupler and Work Tool Options**

Increased versatility with multiple work tools

#### **Couplers**

The E Series is available with a mechanical pin-grabber or a hydraulic pin-grabber quick coupler option. The coupler design uses a wedge to keep the tool secure to the coupler, reducing wear and maintaining a tight fit through the life of the coupler.

The hydraulic coupler allows the operator to change tools without leaving the comfort of the cab.

#### Wide Range of Work Tools

A wide range of Cat Work Tools have been designed specifically for the Cat Mini Hydraulic Excavators to maximize machine performance. Available work tools include:

- Buckets (heavy duty and heavy duty capacity)
- Tilting, Ditch Cleaning Buckets
- Hydraulic Hammers
- Augers
- Thumbs (not available in all regions)
- Vibratory Compactors
- Shears (boom mounted on 305E CR/305.5E CR only)
- Quick Coupler

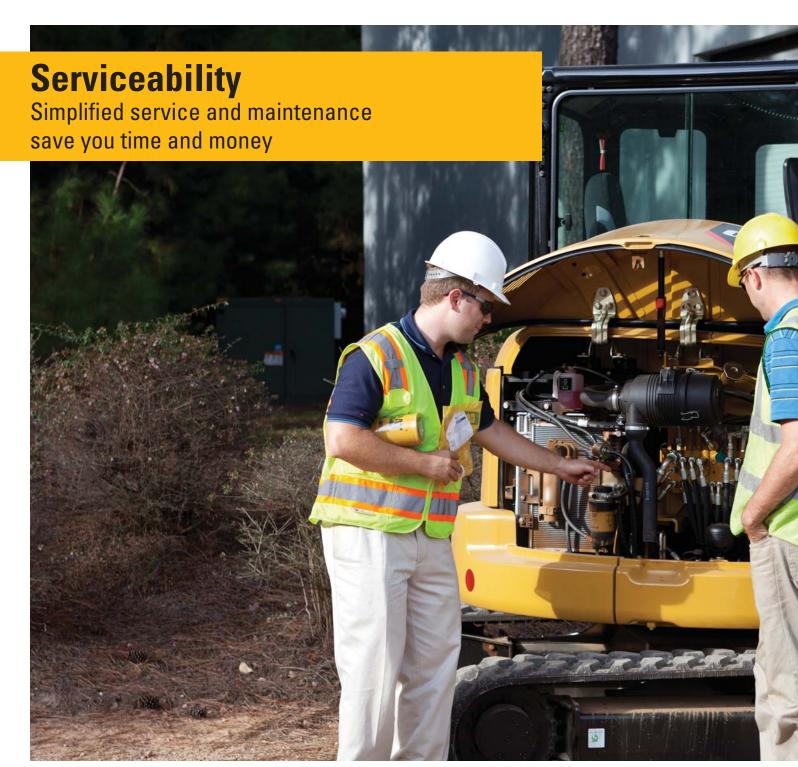

Machines come standard with stick mounted brackets, ready to fit a hydraulic thumb for even greater machine versatility.

A factory installed bracket and relief valve make hydraulic thumb installation simple and cost-effective.

One-way and two-way auxiliary lines (combined function), including quick connections, are fitted as standard equipment so the machine comes ready to work. A standard accumulator allows for auxiliary pressure to be released, making connecting and disconnecting work tools safer and easier.

- Easy access to the radiator and oil cooler results in simplified cleaning and reduced maintenance times.
- $\bullet$  S·O·S<sup>SM</sup> oil sampling valve allows easy sampling of the hydraulic fluid for preventative maintenance.
- 500 hour engine oil and filter change period reduces operating costs and machine downtime.

#### **Easy Service**

Convenient service features make maintenance easy, reducing your downtime:

- Lifting side hood allows access to air filter, main implement valve,
   1-way/2-way auxiliary flow selector, accumulator, fuel filter and hydraulic tank. This eliminates the need to lift the cab when maintaining and servicing the machine.
- Swing open door provides access to major components and service points including engine oil check and fill, vertically mounted engine oil filter, starter motor and alternator.

#### **Customer Support You Can Count On**

Your Cat dealer is ready to assist you with your purchase decision and everything after.

- Financing packages are flexible to meet your needs.
- Unmatched parts availability keeps you working.
- Make comparisons of machines, with estimates of component life, preventative maintenance and cost of production.
- Your Cat dealer can evaluate the cost to repair, rebuild and replace your machine.
- For more information on Cat products, dealer services and industry solutions, visit www.cat.com.

## 303.5E CR, 304E CR, 305E CR, 305.5E CR Standard Equipment

#### **Standard Equipment**

Standard equipment may vary. Consult your Cat dealer for details.

- 1-way and 2-way (combined function) auxiliary hydraulic lines
- Adjustable auxiliary flow control for work tools
- · Adjustable wrist rests
- Alternator
- · Anti-theft security system
- Automatic engine idle
- Automatic swing park brake
- Automatic two speed travel
- Auxiliary line quick disconnects
- · Boom cylinder guard
- · Cab mounted work light
- Canopy with FOPS ISO 10262 (Level 1) and Tip-Over Protection (TOPS) ISO 12117
- Coat hook
- · COMPASS display panel
- · Cup holder
- Continuous flow
- Control pattern changer (not available in Europe)
- Dozer blade with float function
- Economy mode setting for up to 20% fuel savings

- Floor mat
- Foot travel pedals
- Gauges or indicators for fuel level engine coolant temperature, hour meter, engine oil pressure, air cleaner, alternator and glow plugs, service interval
- Horn
- · Hydraulic oil cooler
- Lifting eye on bucket linkage (standard equipment for all regions except Europe)
- · Lockable storage box
- Low maintenance linkage pin joints
- Maintenance free battery
- Rubber track
- · Retractable seatbelt
- · Standard stick
- · Suspension seat, vinyl covered
- "Thumb Ready" sticks (standard equipment for all regions except Europe)
- Travel alarm (optional in Europe)

## 303.5E CR, 304E CR, 305E CR, 305.5E CR Optional Equipment

#### **Optional Equipment**

Optional equipment may vary. Consult your Cat dealer for details.

- · Air conditioning
- Angle dozer blade with float function
- Beacon socket for canopy machines
- Boom check valve (Europe only)
- Boom mounted light
- Cab, radio ready with FOPS ISO 10262 (Level 1) and Tip-Over Protection (TOPS) ISO 12117 with heater/defroster, interior light and windshield wiper/washer
- Ecology drain valve for hydraulic tank
- High back suspension seat, fabric covered

- Hydraulic quick coupler lines
- Lifting eye on bucket linkage (optional in Europe, standard for all other regions)
- · Long stick
- · Mechanical quick coupler
- · Mirrors for cab and canopy
- Seatbelt, 75 mm (3 in) wide (optional in Europe, standard in all other regions)
- · Secondary auxiliary hydraulic lines
- Steel track and steel track with rubber pads

## Notes
